PRERIT SAINI

Flutter Software Engineer

Dehradun, India | +91-9105023038 | sainiprerit6@gmail.com | github.com/Preritsaini | linkedin.com/in/prerit-saini

SUMMARY

Flutter Software Engineer with 1+ year of professional experience shipping production cross-platform mobile apps across fintech, fitness, and e-commerce domains. Skilled in clean architecture, state management (Provider/Riverpod), REST API integration, and performance optimization. Comfortable owning features end-to-end in agile teams, from architecture through deployment.

TECHNICAL SKILLS

Languages: Dart, JavaScript, C++, Go, Python

Frameworks & Tools: Flutter, Firebase, Flame Engine, Git, GitHub, GitHub Actions (CI/CD), Razorpay

Architecture & State Management: Clean Architecture, MVVM, Provider, Riverpod, BLoC fundamentals

Core Competencies: REST API Integration, Authentication Flows, Responsive UI/UX, Database Design, Agile/Scrum, Cross-functional Collaboration

EXPERIENCE

Software Development Engineer I | *Net Stratix Technologies* Sep 2025 – Present

- **Owned end-to-end feature delivery** for production Flutter apps on Android and iOS, including REST API integration and state management with Provider/Riverpod, shipping features used by [10k]+ active users.
- **Optimized app performance** by profiling widget rebuilds and eliminating redundant network calls, cutting app build size by ~18% and reducing dropped frames during key UI flows.
- **Built scalable, reusable UI components** following clean-architecture principles, reducing feature development time for new screens by an estimated 20–25%.

Flutter Developer | *FittVybe* Apr 2025 – Sep 2025

- **Developed core fitness app modules** (onboarding, activity tracking, content browsing) in Flutter, contributing to a smoother first-time user experience and consistent cross-screen theming.
- **Designed and documented a reusable widget/theme library** adopted across the app, cutting duplicate UI code by roughly 30% and standardizing design consistency for future feature builds.
- **Delivered features in bi-weekly agile sprints** alongside backend and product teams, iterating on releases based on direct user feedback.

Flutter Intern | *Team Infits* Apr 2024 – Jun 2024

- **Built core e-commerce flows** including product listing grids, cart management, and a multi-step checkout with form validation, supporting the app's primary purchase funnel.
- **Identified and resolved UI/layout bugs** through manual testing cycles ahead of releases, improving pre-release app stability.

PROJECTS

- **CronoSwap —** Flutter-based time-exchange platform enabling users to trade skills/time through a community-driven booking and matching model.
- **Ebook App with LMS Features —** Flutter e-learning app with a book library, reading-progress tracking, course modules, quizzes, and a user analytics dashboard.
- **Stellar Jet (Flutter Game) —** 2D mobile game built with the Flame engine featuring custom physics, sprite animation, and level progression, optimized for smooth 60fps rendering.
- **NGO/Trust Website Platform —** Deployed a responsive website with content management and a donation/contact flow, currently in production use for the organization.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2023 – Present. *AKTU, Lucknow, India*
